PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

---

PROJECT NUMBER:	8807	SESSION NUMBER:	2
DATE OF SESSION:	2 JUN 88	DATE OF REPORT:	6 JUN 88
START:	1320	END:	1410
METHODOLOGY:	CRV	VIEWER IDENTIFICATION:	095

---

1. (S/NF/SK) MISSION:
  - a. To access and describe the contents of the target structure at encrypted coordinates 913801/893723.
  - b. To describe the purpose and use of items of significant intelligence interest found in the structure, and the personnel involved.
2. (S/NF/SK) VIEWER TASKING: Access and describe the interior of the tasked "manmade" located at 913801/893273.
3. (S/NF/SK) COMMENTS:
  - a. Inclemencies: none reported.
  - b. Viewer 095 began in Stage IV and achieved a tenuous contact with the site. Restarting with Stage I, 095 accessed the target very rapidly and began describing its interior (see drawing on page 2 of session summary).
  - c. Unlike the last session, 095 found site personnel, followed one of them through the day and described his activities.

2 incl: 1 Viewer Summary  
1 Session Transcript

END 1410

CRV

Site is two structures on soft, gently rolling, open, cold land. Inside the main structure it is dry, cold and crisp. Colors in the structure are browns, whites, and reddish brown. The structure is 20-25 feet wide (don't know how long) and has a main room and an equipment room and also a sort of half partitioned off alcove type area. In the main room is a collapsible metal table, some metal things and metal cots. Inside the main room is the sound of a gas stove burning. The equipment room is a room with equipment along all walls, some on tables (see sketch next page). The equipment room appears to be accessible only from the main room of the structure and not from outside. The equipment is electronics type equipment in very sturdy metal boxes with lots of dials and knobs. They appear to be old. Some of the boxes are connected together others are not. One of the pieces of equipment is a radio. Another looks like (AOL/S) a plotter. Many of the equipment cases are a blue metallic color. In the small space in the middle of the equipment room are chairs.

The structure is a 'functional station'. AOL like a weather station. Causing the impression of a weather station were ideas such as equipment, location/area, routine, and fixed schedule. One of the functions of the station is reporting.

In the main structure were at least two men. One was a jack of all trades type, sort of a combination go-fer/handyman. He performs a variety of tasks; he prepares things and also writes and sends reports. Associated with 'writing reports' are the concepts teletype machine, pads of paper, timeliness, scheduled, frequency, progress, and figures and numbers. This person is responsible for keeping track of these numbers and measurements. When I examined how the numbers made me feel; my reaction to the numbers was boredom. There are pages and pages of meticulously recorded numbers.
